## CoRehab (Italy)

CoRehab enables rehabilitation professionals and trainers to provide better treatment to their patients. Corehab's clinically endorsed solutions are based on wearable sensors and interactive software that allow professionals to measure patient's activities and monitor progress remotely in real time.

**Focus Area: Digital Wellbeing  
Healthcare, IoT, Rehabilitation**

[www.corehab.it](http://www.corehab.it)

## Datumize (Spain)

Datumize enables companies to leverage dark data from unexplored data sources such as network transactions, IoT, Wi-Fi technology, industrial networks or distributed locations and gain actionable insights to create growth opportunities.

**Focus Area: Digital Tech  
Business Intelligence, Big Data, AI, Enterprise Software**

[www.datumize.com](http://www.datumize.com)

## DCbrain (France)

DCbrain is the Artificial Intelligence specialist applied to Energy and Logistics networks allowing industrial companies to optimize, forecast and make reliable flows to obtain operational recommendations in real time.

**Focus Area: Digital Industry  
Big Data, AI, Enterprise Software, Logistics, Smart City**

[www.dcbain.com](http://www.dcbain.com)

## Deepomatic (France)

Deepomatic's no-code visual automation platform enables businesses to build their own computer vision applications for unique industry needs. Vision applications enable employees to do more in less time and avoid errors by automating visual tasks such as inspection and quality assessment.

**Focus Area: Digital Tech  
Industry 4.0, Big Data, AI, Enterprise Software, Computer Vision**

[www.deepomatic.com](http://www.deepomatic.com)

## Scaleup Portfolio

### Eiratech Robotics (Ireland)

Eiratech Robotics offers goods-to-person robotics solution for distribution centres and warehouses – whereby a fleet of robots finds and brings items to fulfil online orders and to handle returns.

**Focus Area: Digital Industry**  
Industry 4.0, Warehouse Automation, Robotics, Supply Chain

[www.eiratech.com](http://www.eiratech.com)

### Flynex (Germany)

Flynex is revolutionizing industrial data mining for maintenance and repair operations using drones. It helps corporations save up to 90% of costs compared to traditional data mining processes and significantly increase the quality of data and business insights.

**Focus Area: Digital Industry**  
Drones, Industry 4.0, Robotics, Business Intelligence

[www.flynex.io](http://www.flynex.io)

### Gamaya (Switzerland)

Gamaya improves efficiency and sustainability of farming businesses by offering compelling agronomy solutions, enabled by hyperspectral imaging and Artificial Intelligence.

**Focus Area: Digital Industry**  
Agritech, Big Data, IoT, Satellite Imagery, AI

[www.gamaya.com](http://www.gamaya.com)

### Icometrix (Belgium)

Icometrix helps effectively quantify brain abnormalities through AI-powered imaging solution. They developed icobrain, a portfolio of CE/FDA cleared brain MRI/CT solutions for people with multiple sclerosis, dementia, brain trauma, epilepsy and stroke. And in response to pandemic icolung the first CE marked chest CT scan solution to triage and diagnose COVID-19 patients.

**Focus Area: Digital Wellbeing**  
Healthcare, Big Data, AI, Computer Vision, Medical Imaging

## Scaleup Portfolio

### INFINITE FOUNDRY (Portugal)

Infinite Foundry is a 3D digital plant platform for improved production efficiency of any industrial sector. It uses digital twin technology to build a precise virtual model of the facility in order to run simulations mimicking any operation performed by that facility. This allows for remote monitoring, manufacturing optimization, and virtual training, thus saving costs and increasing operational efficiency.

Focus Area: Digital Industry  
Industry 4.0, Digital Twins, 3D Technology

[www.infinitefoundry.com](http://www.infinitefoundry.com)

### InnoTractor

### InnoTractor (Netherlands)

InnoTractor uses IoT, blockchain and the latest wireless technologies to create digitalisation solutions such as asset tracking and remote condition monitoring.

Focus Area: Digital Tech  
Enterprise Software, IoT, Blockchain

[www.innotractor.com](http://www.innotractor.com)

### MIPU (Italy)

Predictive Hub MIPU brings the power of AI and predictive technologies into factories and cities to cut waste, reduce costs and boost performances. MIPU can detect anomalies in assets up to six months before a failure occurs, which means that operational costs can be cut by 20-30% on average.

Focus Area: Digital Industry  
Industry 4.0, Predictive Analytics, Enterprise Software, AI

[www.mipu.eu](http://www.mipu.eu)

### NEOTAS (UK)

Neotas is an online due diligence provider for financial services. It harnesses open sources, social media, deep web and dark web to deliver insights that dramatically reduce customers' risk of fraud, money laundering and bad hires.

Focus Area: Digital Finance  
Fintech, AI, Due Diligence, Risk Management

[www.neotas.com](http://www.neotas.com)

# EIT Digital Accelerator

## Scaleup Portfolio

### ORIANA (Hungary)

ORIANA offers flexible, low-code, digital workflow platform for back office modernisation. It allows developing new business applications within months, while improving collaboration between business and IT teams.

**Focus Area: Digital Industry**  
Enterprise Software, Backoffice, Web Development

[www.orianeoneworld.com](http://www.orianeoneworld.com)

### ORQUEST (Spain)

ORQUEST offers an AI-powered Smart Workforce Management tool helping retailers improve sales and reduce employee costs by allowing them to schedule, plan, and forecast the shop's sales and employee activities.

**Focus Area: Digital Industry**  
Retail, AI, Workforce Management, Enterprise Software

[www.orquest.com](http://www.orquest.com)

### Sensfix (Poland)

Sensfix is a IoT-connected AI-driven Service Lifecycle Management platform for Operations & Maintenance managers in industrial and enterprise facilities. Using Sensfix they can digitalize their workflows in order to enable devices to self-schedule, self-ticket and manage repair & maintenance needs automatically resulting in up to 30% savings.

**Focus Area: Digital Industry**  
Industry 4.0, IoT, Predictive Analytics

[www.sensfix.com](http://www.sensfix.com)

### SentiOne (Poland)

SentiOne provides Conversational AI platform that allows consumer services companies to analyse what is happening in their customer service communications and automate simplest and most repetitive processes. Its unique natural language understanding engine allows building conversational chatbots and voicebots without any IT team involvement.

**Focus Area: Digital Industry**  
Customer Service, Enterprise Software, Analytics, Chatbots, AI

[www.sentione.com](http://www.sentione.com)

## Scaleup Portfolio

### Squirro (Switzerland)

Squirro enables organizations to transform enterprise data into insights and provides real-time 360° client cockpits. Businesses can generate and convert new leads, improve existing relationships and optimize processes through Squirro's vertical-specific apps which combine human intelligence with powerful AI.

**Focus Area:** Digital Industry  
Customer Management, Big Data, AI, BI, Enterprise Software

[www.squirro.com](http://www.squirro.com)

### STRUCTR (Germany)

Using graph database technology, Structr allows visualization of development steps, which enables all parties involved in digitalization or innovation projects, not only developers and CTOs, to easily understand and influence the software solution themselves.

**Focus Area:** Digital Tech  
Graph Technology, Big Data, AI, Enterprise Software

[www.structr.com](http://www.structr.com)

### SwipeGuide (Netherlands)

The SwipeGuide platform and apps empower manufacturers to improve operational knowledge and performance across sites, lines, and teams. It helps customers (Heineken, PepsiCo, Orkla, and ABB) improve First-Time-Right (+26%) while improving workers' knowledge retention by 25%.

**Focus Area:** Digital Industry  
Industry 4.0, AR, Enterprise Software, Employee training, Big Data

[www.swipeguide.com](http://www.swipeguide.com)

### Synerise (Poland)

Synerise is an end-to-end platform that uses data and AI to help brands better respond to the needs of their customers through automation, business intelligence reporting, communication and personalization tools, and pricing policy management. All in real-time and at scale, regardless of the size of operations.

**Focus Area:** Digital Industry  
Ecommerce, Big Data, Marketing Analytics, Enterprise Software

[www.synerise.com](http://www.synerise.com)

## Scaleup Portfolio

### TalentAlpha (Poland)

Talent Alpha is a SaaS Platform that is transforming the way organizations around the globe measure and manage Tech Talent by creating a digital representation of their talent genome. It also easily allows them to scale up and down their IT workforce using the Human Cloud.

**Focus Area: Digital Industry**  
HR tech, Enterprise Software, Big Data, AI

[www.talent-alpha.com](http://www.talent-alpha.com)

### Targomo (Germany)

Targomo is a unique location intelligence solution than helps businesses & organisations optimise location planning. Through their multisource data collection and algorithms, they are able to unveil the most suitable location setting for a broad range of verticals: retail, multimodal transportation, real estate investment and etc.

**Focus Area: Digital Cities**  
Location Intelligence, AI, Big Data, Retail, Cities, Real Estate

[www.targomo.com](http://www.targomo.com)

### United Signals (Germany)

United Signals turns paper-based businesses into streamlined digital dealmakers through its white label multi-language solutions for digital onboarding, electronic contracts and client portals that work for companies of all industries. It is already used by leading banks in Germany (incl. DAB BNP Paribas, V-Bank, Comdirect) and has been selected by the Association of Independent Asset Managers to become a new market standard.

**Focus Area: Digital Finance**  
Fintech, Asset Management, Enterprise Software, Banking

[www.united-signals.com](http://www.united-signals.com)

### Velco (France)

Velco offers the all-in-one management solution for connected eBikes and eScooters in Europe. Its modular white label software platform connected to Velco hardware technology enables fleet management optimisation, accidents detection, geofencing and safety.

**Focus Area: Digital Cities**  
Smart Mobility, Transportation, Computer vision, IoT

[www.velco.bike](http://www.velco.bike)

# EIT Digital Accelerator Scaleup Portfolio

## Versabox (Poland)

Versabox's smart automation platform delivers more efficient intralogistics in factories and warehouses. It is based on autonomous mobile robots (AMRs) and software modules for process design, simulation, execution and control of AMR deployments.

**Focus Area: Digital Industry**  
Robotics, Industry 4.0, Warehouse Automation, Logistics

[www.versabox.eu](http://www.versabox.eu)

## VRgineers (Poland)

VRgineers is a virtual reality engineering company developing and manufacturing cutting-edge enterprise-grade VR gear for professionals. Its new generation high-resolution VR headset platform is used by clients in the automotive, architecture, industrial design, and training sectors, enabling them to transform their work with virtual reality.

**Focus Area: Digital Industry**  
Industry 4.0, VR, AR, Automotive

[www.vrgineers.com](http://www.vrgineers.com)

## Wishibam (France)

Wishibam's solution allows retailers to seamlessly integrate e-commerce into their offer and leverage the benefits of omnichannel to provide seamless customer experience, improve operations efficiency and increase sales.

**Focus Area: Digital Industry**  
Retail, Omnichannel, Ecommerce

[www.business.wishibam.com](http://www.business.wishibam.com)

## YAS.Life (Germany)

With YAS.life's customizable gamified mobile app, Life & Health insurance companies can motivate their policyholders to adopt a health-conscious lifestyle and thus reduce healthcare costs and risks while strengthening their brand image and benefiting from actuarial valuable data.

**Focus Area: Digital Wellbeing**  
Insurtech, Healthcare, AI, Gamification, Life & Health

[www.yas.life](http://www.yas.life)
