

Matchmaking

During the event, you will have the opportunity to meet startups specialised in cybersecurity via:

- formal pitches
- informal meetings during the breaks
- our B2B platform that will give you the chance for one-to-one meetings to make the right connections and develop your business:

www.b2match.eu/ECWbusinessmeetings

Contact to set-up matchmaking meetings:
Pierre SERVEL +33 (0)6 88 46 60 73

The list hereunder presents a panel of startups participating to the event and the matchmaking meetings.

Visit our B2B platform to view full list of participating businesses.

Startups specialised in cybersecurity supported by the EIT Digital Accelerator

SecludIT

SECLUDIT provides a risk management solution for businesses, integrators and providers to safeguard their infrastructure, data, e-commerce sites at a time when people are shifting towards dematerialisation and the Cloud.

Website: <http://secludit.com>  @SecludIT

Mynigma

MYNIGMA is an automatic data encryption app designed to protect users' messages. It uses an advanced communication platform allowing people to send encrypted messages via a user-friendly interface.

Website: www.mynigma.org  @Mynigma

Origone

ORIGONE offers an integrated and military-grade cybersecurity solution which anticipates potential threats and protects the entire IT infrastructure stack (mail gateways, desktops, tablets, mobiles) of businesses.

Website: origone.fr  @origoneLtd

Woleet

The Woleet platform creates time-stamped (and optionally signed) proofs of existence of data. These proofs are cheap, valid worldwide, durable, unfalsifiable and require no trusted third party. Use cases are multiple: IP protection, document certification, contract signing, IoT data time-stamping, and much more.
