

Biography

Gian Mario Maggio

EIT Digital Trento Node Director

Dr. Maggio has more than twenty years of international experience, both in the public and private sector, including over ten years of management experience. In particular, he has gained extensive industry experience in the digital innovation sector, both in Europe and the USA, working for companies such as Philips and STMicroelectronics.

Prior to being appointed Node Director, he was working as Co-Location Centre Manager at EIT Digital Italy, being responsible for the Trento Co-Location Centre and the Milan Satellite operations. In recent years, he had been acting as Research/Innovation Policy Director at FBK (Fondazione Bruno Kessler) in Trento, as Research Director at CREATE-NET (Center for REsearch And Telecommunication Experimentation for NETworked communities) also in Trento, and as Head of Cluster at COST (European COoperation in Science and Technology) in Brussels.

Dr. Maggio was grown-up within prestigious academic institutions, namely he holds a Master degree from Politecnico di Torino (1995) and a PhD degree from University College Dublin (1999), both in Electronic Engineering. He held visiting research positions at the Swiss Federal Institute of Technology, Lausanne (EPFL), at University of California, Berkeley (UCB), and at University of California, San Diego (UCSD). Dr. Maggio was multi-awarded by several international academic and professional institutions. He is the author of over 100 publications in international journals and conferences (inc. Best Paper Award), co-author of international patents and major contributor to standards (e.g. IEEE 802.15.4a).
