Company Address: **Annankatu 34B, 00100 Helsinki**

Internship Hours: **Full-Time**

Compensation: **TBD**

## 1.1. About us

Aito is a database-like service with machine learning abilities. The unique combination of database and AI brings incredible benefits over traditional AI approaches. Our target group are software developers, and we are a SaaS-product for B2B.

We're a Helsinki-based startup, spin-off from Futurice, established as an independent company in the spring of 2018. We're launching our beta product in Nov 2018.

## 1.2. Internship description

Automating the customer on-boarding and UI in order to guarantee an exceptional user experience for our customers (software developers).

We are about to launch our beta product (Nov 2018) so in the summer of 2019, we will have very concrete things to improve or add to our user interface.

Depending on the status of the product at that time, and the profile/interest of the candidate, we will select a specific part of the user journey to automate or improve (automating payment flows, creating dashboards AI chatbot, ...).

### **1.3. Responsibilities**

- Bringing an idea to production, involving all steps from design, user tests, to writing the actual frontend code. (supported by our tech team, of course)
- Help in the customer support, in order to understand our customers (=developers) better
- Use the questions from customer support to improve and automate the product further
- Contribute ideas to improve Aito's web interfaces
- Document all your work in a standardized way

### **1.4. Minimum Requirements**

- min 2-3 experience with web development - either through studies or hobby projects
- knowledge of modern web tooling such as npm, React, eslint, babel, and of course CSS and Javascript
- Knowledge of web design concepts and ideally some experience/interest in UX/UI design

### **1.5. Desired Qualifications**

- active in the developer community (egs. Reddit)
- interested in AI and ML
- being hands-on and a critical thinker
- eager to learn the SaaS-ecosystem

### **1.6. Benefits of Working with Us**

- being part of a startup, which will change the AI ecosystem
- great learning environment of which 70% of the staff has over 10 years' experience
- no micro-management
- possibility to grow and be part of our global expansion after your studies
