Compensation: **€1000/month**

1.1. About us

Cleverciti Systems is a fast-growing innovation leader in the field of smart parking technologies.

Our vision is to take the 'stress' out of finding a parking space and reduce search traffic and emissions. Cleverciti Systems offers a turn-key parking solution for cities, airports, shopping malls and all those who want to manage their parking space intelligently.

Our company is undergoing a strong global expansion and if you are a go-getter with an entrepreneurial spirit, we need YOU!

1.2. Internship description

At Cleverciti, we combine state-of-the-art technology and German engineering to enable our clients to manage parking efficiently and cost-effectively. Our technologies involve several layers - hardware, front-end, and back-end - that involve continual innovation. We will know closer to next Summer the exact

project needs we can identify (as our needs quickly change). The intern will work on developing and integrating our technologies.

1.3. Responsibilities

The role could include any of the following: Electronic and PCB design, building prototypes; Sourcing and device research; Embedded software development; Embedded system experimentation and testing.

1.4. Minimum Requirements

- 3rd semester of relevant study
- proficiency in MS Office
- English - verbal & written fluency
- Strong programming skills
- Majoring in Computer Science, Computer Engineering, or Electrical Engineering

1.5. Desired Qualifications

- Relevant experience
- Technical affinity
- Team player

1.6. Benefits of Working with Us

- You will be come part of an innovative, dynamic and international team
- Work with us on the future in a job that really counts!
- Opportunity for your project and ideas
