

Biography

Christian Sckerl

Node Director of EIT Digital Germany

Christian Sckerl is part entrepreneur and part executive with a strong international background in technology industries. He was part of the US internet hype in the late 90's where he participated at Todosport Network, a start-up which was later sold to Umbro. He studied Electrical Engineering at the Universidade Paulista at São Paulo as well as at the University of California and received a Graduate Management Certificate from the Harvard Extension School in Boston, USA.

His 25+ years of management experience in the automotive, engineering and telecommunication sectors, venture capital, e.g. at MMC Automotors, Quantitech Engineering, T-Venture Holding are enriched by over 10 years of entrepreneurship with companies he co-founded. He served as VP Technical Standardization at Deutsche Telekom and also held several board member functions.
