

TEEPTRAK

Digital Industry

Cost-effective tools to monitor your performance in real-time

TEEPTRAK develops innovative and accessible solutions for industrials to monitor machine performance, operators' pace and product quality in order to identify wastes, and thus improve the overall production efficiency.

TEEPTRAK offers general and customised cost-effective solutions to monitor machine performance, operators pace and product quality. Leveraging the latest technologies, advanced algorithms and operators input, the solutions bring useful information in order to significantly achieve a sustainable, efficient and continuous improvement. Once data is gathered, a set of real-time functions

are available to support shop floor and management in day-to-day operations: performance analysis, automatic reporting, alarms, etc. TEEPTRAK's ready-to-use systems are a mix of hardware and software components that clients can install and configure autonomously.

Scaling up European Digital Ventures

Key Success Factors/USPs

- Plug&Play solutions, easily installed and configured
- Can work on a simple WiFi hotspot
- All-in-one: Hardware and software included. No extra costs to expect
- Autonomous maintenance
- Replace paper-based and time-consuming reporting actions
- Competitive price: ~1500€ per equipment

Target Markets

- All industries (currently in Automotive, Aeronautics, Healthcare, Food etc)
- Europe (Priority to France, Germany and Italy)
- New branch in Hong Kong. Chinese market first, then Asia
- Products available in 8 languages

References

- Clients include: Groupe PSA, Essilor, Safran, Groupe Savencia, Alstom, Faurecia, Hutchinson, Boston Consulting Group, and several SMEs
- 3rd Prize EIT Digital Challenge 2015, Neuilly Tech Winner, IAR Green Innovation Program

Company

- Founded in 2014
- First commercialisation in 2016
- Founders: Francois Coulloudon (CEO), Guillaume Artigue (CCO), Jean-Marc Delafont (CTO), Antonin Sibois (Lead Dev. Android)
- Headquarters in Paris (France)
- 10 employees
