

### Our goal: make our partners maintenance world champions

Maintenance

**Asset Management** 

Life Cycle Management

Competiveneness

Safety

Sustainability

#### **WCM Partners**

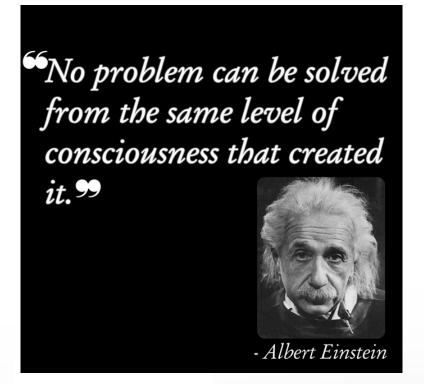

## Young WCM

### We believe in

Open Innovation

Cross-sectoral cooperation

Cooperation of companies, knowledge & education institutes and government

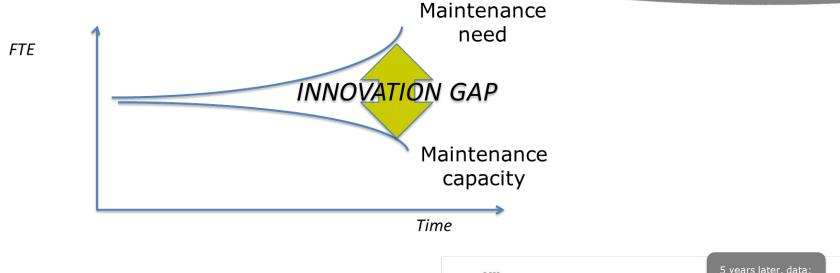

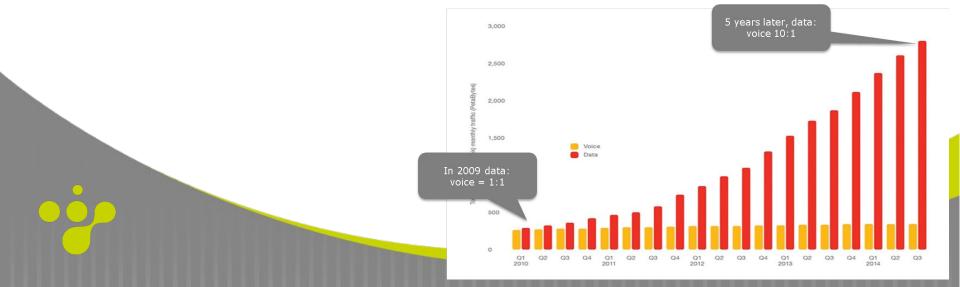

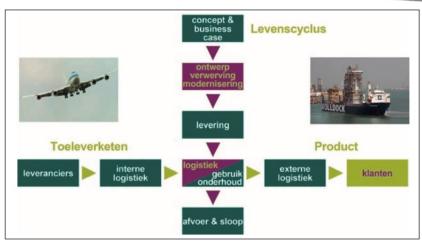

# Aging assets meet digital manufacturing

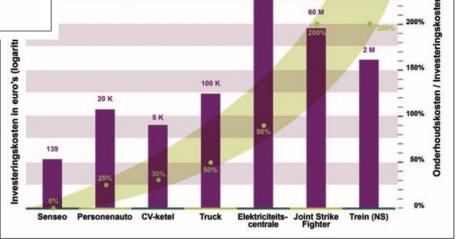

# Smart Moves: Asset management is of strategic importance, but underestimated

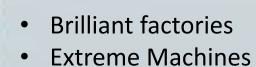

Source: van Dongen, L. (2011): *Maintenance engineering*. Inaugural lecture, Twente University

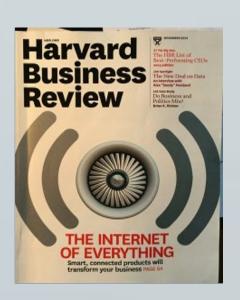

An industrial revolution is happening as multiple new technologies converge

- Energy Everywhere
- Mapped minds
- Super materials
- Industrial internet

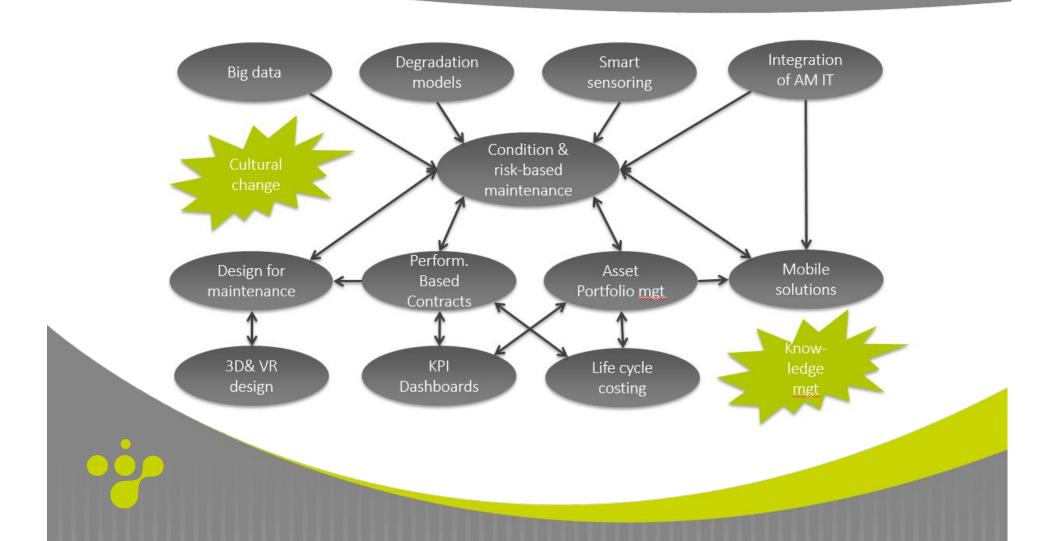

Six technologies that will shape our future

# Non-technical process innovations, culture changes and data-driven in the Top-14

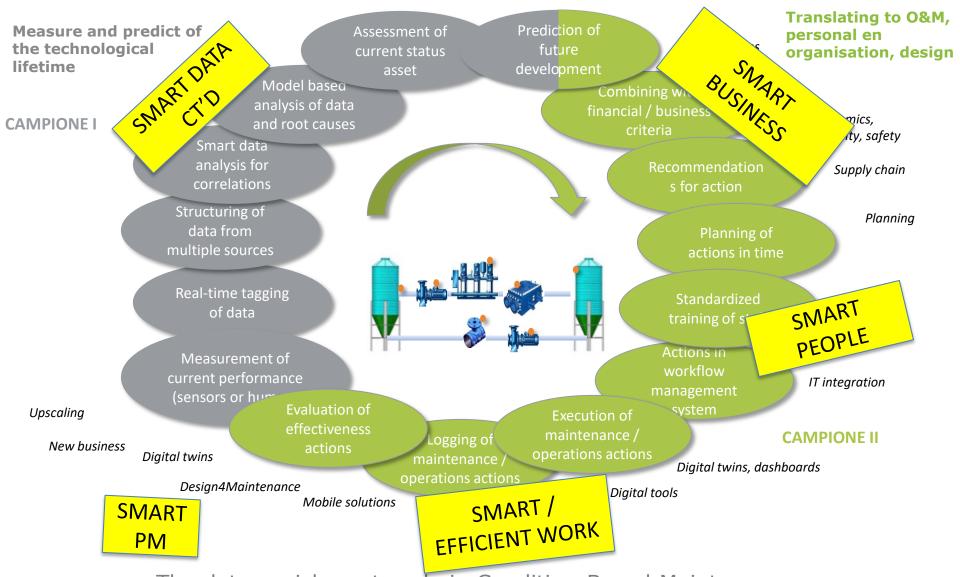

Rank	No.	Name	Importance	Impact
1	124	Big-data analytics	21	5.6
2	130	Smart sensors	21	5.0
3	101	Cultural and behavioural change	20	6.1
4	121	Condition and risk-based maintenance strategies	20	4.7
5	125	Design for maintenance	20	5.7
6	103	Knowledge management	16	5.5
7	108	Interfacing AM IT systems	16	4.8
8	119	Degradation Models	16	5.0
9	l18	Life cycle costing	15	4.8
10	110/29	Performance dashboards	14	4.4
11	114	Asset portfolio management	14	5.0
12	107/06	Performance contracting	13	4.0
13	127	Mobile solutions	12	4.8
14	105	3D design and virtual reality	10	4.4

### Deep interdependencies between the top-14 maintenance innovations

#### The focus areas are covering the whole CBM cycle

The data-enrichment cycle in Condition-Based Maintenance

### Towards zero downtime

UNIVERSITEIT TWENTE.

In total 42 objects in scope

Focus 1: Zwartewaterbridhe - Hasselt

UNIVERSITY OF TWENTE.

Focus 2: Bridge/lock Aadorp

more awareness. better business.

Test oven for waste disposal at TNO/ECN in Petten

Fieldlab The Learning Stone

### Case Challenge – Energy Transition

### Wrap-up

- Maintenance isn't anymore a cost factor but evenmore added value
- There are now good sensors
- Internet of things and big data
- Predictive maintenance isn't a wish; it is used now
- Fieldlabs are easily accesible
- Proffesional schools are teaching the employee of the future data analytics
