

# Digital Industry OEDIPUS

## i-Cknow Platform: Innovation & Collaboration knowledge Platform

Supporting innovation and adoption processes with collaborative spaces for Industry 4.0. A one-stop-shop marketplace of services providing industry with access to the most advanced digital solutions.

The objective of the i-Cknow Platform is to overcome the current barriers preventing start-ups and SMEs to directly address the Manufacturing Industry market. The Platform aims to support collaboration and collective intelligence processes in an extended multidisciplinary ecosystem, enabling the “social dimension” to any service provided on top of the Platform. Integrating several Open Source components, the i-Cknow Platform aims to support stakeholders of the digital industry

in: defining paradigms and methodologies to foster the cooperation, collaboration and the human-oriented management of information and knowledge; realizing a marketplace to offer products and services in the domain of Digital Industry; driving towards business objectives achievements.

**THE FUTURE OF  
EUROPE'S DIGITAL  
INNOVATION**

EIT Digital is supported by the EIT,  
a body of the European Union

## Competitive Advantages

- A unique access point, integrating a human collaboration environment, an asset repository, and a marketplace
- Easy configuration, leveraging on open APIs and a rather complete configuration environment
- A careful initial design of the user experience with accurate choice of the right content and of the most suitable access methods
- Open APIs to integrate existing web portals and content repositories.

## Target Markets

- Business Ecosystems with special focus on SMEs
- Regional and national networks of Digital Innovation Hubs and Competence Centers.

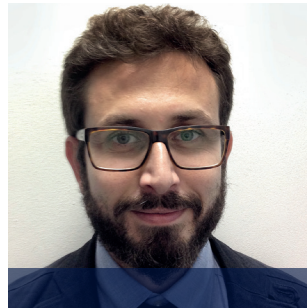

## Status/ Traction

- Experimentations running in some of the OEDIPUS i-Centers
- One commercial experimentation running at national level in industrial context in Italy
- Demo version available under request.

## Road Map

- Definition and implementation of a set of shared KPIs (at the strategic-tactical-operational levels) automatically measured
- Further experimentations in other OEDIPUS i-Centers to support, coordinate and govern a network of heterogeneous communities and SMEs ecosystems.
