

Digital Finance RegOn

PRODUCT LAUNCH

PARTNERS: SIA (Italy), FBK (Italy), GFT Italia (Italy), JRC (Germany), Paris Europlace - FI (France)

The Movable Collateral Registry On-chain

RegOn is a digital movable asset registry based on blockchain technology to create a new ecosystem to boost the issuing of credit lines towards SMEs guaranteed by trusted and registered collateral

RegOn is a movable collateral registry where notices over movable asset used as collateral are recorded and published, allowing lenders to check borrower's creditworthiness and ranking and prioritization of lenders for each collateral. Through RegOn, Creditors will be able to register notices directly On-chain making them immutable, traceable and auditable, thereby reducing the risk of improper tampering.

This makes the system safer prioritizing the rights of the Creditor over the others. It's a fully digitalized platform native speaking blockchain designed to contribute to the efficiency of the process and with an easy-to use approach

THE FUTURE OF
EUROPE'S DIGITAL
INNOVATION

eitdigital.eu
f o i n t w @EIT_Digital

EIT Digital is supported by the EIT,
a body of the European Union

Competitive Advantages

- With blockchain, RegOn assures integrity and transparency attracting more lenders to improve the access credit and fuel growth of SMEs
- It allows cross selling opportunities thanks to the development and the offering of new value-added services which take advantage of the Blockchain network effects

Target Markets

- Central Authorities, Banks
- France, Belgium, Spain, Italy, Romania, Poland, Serbia, Bosnia and Herzegovina, Albania, Czech Republic, Slovak Republik, Slovenia

Status/ Traction

- We involve relevant customers across Europe
- SIA is Business Champion and Activity leader
- GFT Italia is technical partner for product development
- FI is Business exploitation partner and Go-to-Market responsible
- JRS supports Go-to-Market Strategy
- FBK is AI expert for innovation study

Road Map

2021

- Integration of new services and technologies (IOT and AI)
- Localization and extension to other European Countries

Leveraged Technologies

The RegOn product delivers integrated modules on an existing blockchain infrastructure (SIACChain). RegOn combines blockchain technology, IoT and AI to accelerate and facilitate access to credit and funding especially for MSMEs. Blockchain makes it possible to have a decentralized and quicker way of building asset registries, creating trusted, secured and monitorable records of movable assets. Smart contracts can contribute to the efficiency of asset registries by allowing automatic execution of pledged collateral or its automatic un-pledge and re-pledge.

RegOn
Registry On-chain

RegOn is an innovation activity proudly supported by EIT Digital.

EIT Digital supports entrepreneurial teams from research and business organisations in launching new startups and new products in agile 12-month projects called innovation activities. These activities are embedded in EIT Digital's European ecosystem and receive a financial co-investment to package their technology, sign up customers and attract investors.
