DistributiX

STARTUP CREATION

PARTNERS: KTH (Sweden), E-Group (Hungary), F-Secure (Finland), Safemove (XXXX) Bittium (Finland), Stockholm University (Sweden)

DistributiX - Identity & Attributes & Authentication brokerage services – One API above all

DistributiX combines Identity data and Bank History data (PSD2) from multiple service providers. Designed with security in mind, the DistributiX API aggregates data in a fast, efficient and reliable solution.

DistributiX brokerage services are designed to serve as a single point of integration for accessing Identity & Attribute providers, making integration seamless through just one endpoint.

Putting safety at the heart of everything, DistributiX brokerage services are secured by F-Secure's market leading technology for vulnerability and threat hunting as well as response automation, ensuring advanced fraud management

and evaluation risks within each transaction.

Accessing DistributiX brokerage services' single API makes cross-border Identity & Attribute transactions easy to integrate in an existing infrastructure, reducing time and maximizing cost-effectiveness.

**THE FUTURE OF
EUROPE'S DIGITAL
INNOVATION**

eitdigital.eu
f o i n t w @EIT_Digital

EIT Digital is supported by the EIT,
a body of the European Union

Competitive Advantages

- Simple and easy integration in an existing infrastructure
- Access to a potentially large market
- Reduction of time and cost of integration
- Security of services and processes
- Cross-border Identity & Attribute transactions
- Single API to access Identity & Attribute data
- Access data in real-time
- State-of-the-art security

Target Markets

- Banks: digitize customer journey and design a customer-centered solution
- Lenders: no compromises between fast and secure customer onboarding and data availability for scoring
- FinTech startups: real-time access to banking data
- Retail companies: loyalty programs based on bank history data
- Rental companies: proof of fund of customers

Status/ Traction

- Technology development will continue its way of maturation based on feedback from involved pilot customers.

Partners:

- E-Group – provide an IDX platform, the base for the AIA proxy node compliant with eIDAS to interconnect private and public IDPs nationally and internationally
- F-Secure – state-of-the-art technology for vulnerability and threat hunting and response automation
- Bittium – offer technology for corporate authentication based on secure hardware tokens
- KTH Royal Institute of Technology – provides algorithms for automated security response
- Stockholm University – testing and validation of the developed solution

Road Map

2021

- finalize the DistributiX API connection to Finnish Identity and Attribute providers

2022

- continue the expansion of I&A providers in Nordic countries

Leveraged Technologies

State of the art identity exchange platform capable of SSO and federation (E-Group). Device level multi-factor authentication and incident detection (Bittium). Cloud-based automated vulnerability and risk management (F-Secure). Decision and learning tools for optimal response (KTH).

DistributiX brokerage services is an innovation activity proudly supported by EIT Digital.

EIT Digital supports entrepreneurial teams from research and business organisations in launching new startups and new products in agile 12-month projects called innovation activities. These activities are embedded in EIT Digital's European ecosystem and receive a financial co-investment to package their technology, sign up customers and attract investors.
