

### **“Future Cloud” Action Line Leader: Tua Huomo**

Tua Huomo is currently working as a research coordinator at VTT Technical Research Centre of Finland in the area of digital services and business research. Her preference is to run projects and programs mainly in applied research.

She is definitely result oriented and very eager to take new challenges. Some years ago, totally aware of the market’s needs, Tua decided to pass a MBA in order to work in companies.

While now for many years in VTT EU activities and in the Cloud software program, Tua was closely following-up the implementation of EIT ICT Labs from its very beginning.

Nowadays many companies and organizations stress on how to get benefits out of the cloud, in order to make business as fast as possible.

The cloud is enabling new types of services for all of us.

Tua Huomo is aiming to foster these services on a European level, for a better common benefit, to engage customers in different ways to share results and information, and understand most of all what they value in.

She aims to target companies but also general public.

Dr. Tua Huomo has 20 years' experience of the ICT sector. She is currently working as a research coordinator at VTT Technical Research Centre of Finland in the area of digital services and business research. Additionally, she has been working since 2010 as a program coordinator in the Tivit's ([www.tivit.fi](http://www.tivit.fi)) cloud software program ([www.cloudsoftwareprogram.org](http://www.cloudsoftwareprogram.org)), which is a large collaborative research initiative in the field of cloud technologies, processes and business. Huomo has worked for VTT from 1997-1999 and from 2004 onwards. Prior to VTT, she worked as a Director of R&D at Cybelius Software and had various development and management assignments at the CCC Group. She received her PhD in information processing science from the University of Oulu, Finland in 2000 and MBA with distinction from Oxford Brookes University, UK in 2009.
